FOR SALE INFORMATION CALL:

**Nathan Oliver
435-660-0291**

OR

VISIT THE WEBSITE AT

utahherefordassociation.com

pictures and videos of sale animals can be viewed on the
website 2 weeks prior to the sale.

SALE DAY PHONE NUMBER:

Nathan at 435-660-0291

OR

Producers at (435) 529-7437

**We are excited to offer the opportunity to bid online this
year. To register to bid online please follow these steps.**

**1. Contact Producers Livestock Auction at least a day or
more prior to the sale and they will get you set up to bid.**

Producers phone number is (435) 529-7437

2. Go to CattleUSA.com

**3. Click the login option under the logo on the left hand
side of the screen.**

4. Login or create a new account.

**5. On sale day, find the auction titled *Producers Salina*
and click live.**

TERMS AND CONDITIONS

All animals will be sold to the highest bidder.

The auctioneer will settle any dispute as to bids by declaring all bids off, and reselling the animal.

Announcements from the auction block will take precedence over printed material in this catalog

All sales are for cash. No cattle will be released until payment is made.

Arrangements can be made to feed and care for the bulls after the sale at the buyers' request and risk.

All bulls are guaranteed as breeders for 120 days after sale day. In the event the seller cannot prove the bull to be a breeder, he will replace the bull with one of equal quality, or he may choose to refund the purchase price.

HEALTH: Each animal selling will have a STATE APPROVED HEALTH CERTIFICATE. All bulls must pass a soundness inspection to go through the sales ring.

All bulls have passed semen and trich tests.

Bulls

The following table is the EPD's that are listed in the catalog, along with an explanation for what each number means. These EPD's can help in determining what you could expect from offspring compared to another animal in the hereford breed.

CED	CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age.
BW	BW EPD is an indicator trait for calving ease and is measured in pounds.
WW	WW EPD is an estimate of pre-weaning growth that is measured in pounds.
YW	YW EPD is an estimate of post-weaning growth that is measured in pounds.
MILK	The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability.
M&G	Maternal Milk & Growth reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of daughters' progeny weaning weight.
BMI	The Baldy Maternal Index is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows.
CHB	The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows where all progeny will be targeted for Certified Hereford Beef after the finishing phase.

Super thick calving ease bull

Heifers

The following table is the EPD's that are listed in the catalog, along with an explanation for what each number means. These EPD's can help in determining what you could expect from offspring compared to another animal in the hereford breed.

CED	CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age.
BW	BW EPD is an indicator trait for calving ease and is measured in pounds.
WW	WW EPD is an estimate of pre-weaning growth that is measured in pounds.
YW	YW EPD is an estimate of post-weaning growth that is measured in pounds.
MILK	The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability.
M&G	Maternal Milk & Growth reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of daughters' progeny weaning weight.
BMI	The Baldy Maternal Index is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows.
CHB	The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows where all progeny will be targeted for Certified Hereford Beef after the finishing phase.

NOTES:

This opportunity won't be offered often. Our National Champion bull in Reno 2025. He has so many great cows in his pedigree he will be a tremendous breeding bull.
